### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of claims 1-14 is the inclusion of a method of printing a test pattern on an image recording medium sheet and using at least one measured test pattern to determine at least two registration errors. This is found in all of claims 1-14, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claims 15-26 and 31 is the inclusion of a set circuit or routine that generates a test pattern, the test pattern comprising a LE target and the sheet has an outboard edge and an outboard edge pivot point, the test pattern being printed on a recording medium sheet and uses the determined errors to simultaneously reduce at least two of the determined registration errors. This is found in all of claims 15-26 and 31, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claims 27, 28, and 32 is the inclusion of a method of providing a test pattern on a sheet; and making measurements of a plurality of registration errors based on a test pattern. This is found in all of claims 27, 28, and 32, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claims 29, 30, and 33 is the inclusion of a measurer that makes measurements of a plurality of registration errors based on the test pattern and an error corrector that determines error corrections for the plurality of registration errors using an algorithm. This is found in all of claims 29, 30, and 33, but not disclosed nor suggested by the prior art of record.
